PROJECTS AND INDEPENDENT LEARNING

- **Procountor coursework:** Completed a practical accounting simulation project using Procountor as part of my university studies
 - Hands-on experience in reporting payroll, accounts receivable and payable, VAT, financial statements and company purchases
- **Econometric modeling with Stata:** Performed econometric analysis to assess macroeconomic drivers of GDP growth
 - Learned to analyze macroeconomic data, interpret statistical models and regression coefficients, and critically assess model validity
- **Developing financial skills at Coursera:** Independent studies in FP&A, Forecasting, Modeling and Management
 - Developing skills relevant to portfolio management and FP&A tasks. Independent courses have helped me develop deep analytical skills and the ability to understand key insights in asset management and financial modeling.
